NOTES:
CTS implementation of COVID-19 testing will occur in several phases.
- Initial implementation includes:
  - Anti-SARS-CoV-2 Total with reflex to RVPN as applicable with manual result reporting
- Subsequent implementation phases will include the following:
  - Anti-SARS-CoV-2 Total with SARS-CoV-2 RUO NAT if requested
  - Conversion of manual result reporting to current automated reports:
    - Addition of Anti-SARS-CoV-2 Total to LifeTrak
    - Addition of SARS-CoV-2 RUO NAT to LifeTrak
    - Addition of SARS-CoV-2 RVPN to SD_Net

Results of SARS-CoV-2 testing are intended for qualification of COVID-10 convalescent plasma and may NOT be used for donor management, donor counseling, or diagnostic purposes.
